

Keys to Depot Key, with not more than 8 feet on the Bulkhead, after passing the elbow round Middle Keys. Coming from the Northward and Westward keep in 8 fathoms till N. Key bears E.  $\frac{1}{2}$  N. (East,) to avoid many shoals of hard sand extending from Suwannee river. N. Key channel and the Swash, South of Sea Horse Key, are only useful for boats. There is good anchorage under the East side of Sea Horse Reef, safe in Westerly gales. All channels of any value are staked out and readily discovered, as bottom is of hard sand with occasional patches of dark grass.
