There is hereby appropriated for the consolidation and simplification of the component parts and functions of the State Government of Florida, and for the employment of the expert and clerical assistance necessary to effect such re-organization and simplification; and for such study and investigation of the organization and functions of local government in Florida as the Governor in his discretion may deem advisable not exceeding Twenty-five Thousand Dollars (\$25,000.00).

It is hereby provided that the Governor in the execution of the powers and duties conferred by this appropriation of Twenty-five Thousand Dollars (\$25,000.00) may appoint and associate with him for this purpose a commission composed of outstanding business men of Florida, of such number as the Governor may determine, who shall serve without compensation.

SECTION 8. All appropriations provided for by this Act are maximum appropriations, based upon the collection of sufficient revenue to meet and provide for such appropriations. If, in the opinion of the Governor, the revenues to be collected will be insufficient to meet the appropriations herein provided for, he shall so certify to the Budget Commission, and the Budget Commission shall adjust and/or reduce the budget of any Department or Board, by the consolidation of positions or duties to the end that efficiency and economy may result therefrom, and the appropriations kept within the revenues of the State. In the event the Budget Commission shall fail to adjust and/or reduce the Budgets of the several Departments, after the Governor has certified that the anticipated revenue will not permit of the maximum appropriation herein made, the Governor is hereby vested with power and authority to effect such changes by executive order, it being the intent and purpose of this Section to prevent any deficit in any Department of the State Government, and that the revenues available shall be used in the most efficient and economical manner. Provided, however, that this Section shall not be construed to mean that the Governor or the Budget Commission has the power to eliminate any department of Government.

SECTION 9. All laws or parts of laws in conflict herewith are hereby repealed.

SECTION 10. This Act shall take effect on July 1st, 1933,

FLORIDA STATE SENATE

June 2, 1933.

Hon. T. G. Futch,
President of the Senate,
State Capitol,
Tallahassee, Florida.

Dear Senator:

I hand you herewith report of your Committee upon finding of its investigation of the State Prison Farm at Raiford, Florida.

Very truly yours,
J. M. MANN, Chairman,
W. C. CHOWNING,
S. D. CLARKE.

FLORIDA
STATE FARM
RAIFORD
May 21, 1933

L. F. Chapman,
Superintendent.

Dr. J. M. Mann,
Senator from District 15,
Tallahassee, Florida.

My Dear Doctor:

In compliance with your instructions of this morning, I

am sending you some data regarding the State Farm, and conditions here; using a separate sheet for this. I trust this will give you the information you need but if there is any further information I am able to furnish, I shall take great pleasure in getting it to you.

As you may wish to know something of the work I have done since coming to the State Farm, something over eight years ago, I beg to submit the following account.

When the position of Horticulturist was created, the board asked Dr. Newell of the Experiment Station, to recommend someone for this position. Dr. Newell was kind enough to recommend my appointment. I hold a certificate from the California State Board of Horticulture showing my eligibility for appointment as Horticultural Commissioner of one of the largest fruit growing counties in California. This certificate was granted only after a very rigid civil service examination by that Board.

The State Farm, when I came here, was about as near a thrown-away place as could well be imagined for a state institution. The fields were nearly all grown up in broom-sedge, ditches filled, and very little farming going on. Drainage was practically out of commission.

I went to work trying to make improvements, and it was entirely my work putting fields back into cultivation, planting hundreds of orchards (now just commencing to bear), putting in drainage systems, including dredging New River and canals to take off water that had ruined our crops year after year. This drainage system is by no means complete, but already work has been accomplished sufficient to make a vast difference here. The dragline was used to make fill on the new highway at approaches to new concrete bridge, and State Engineers informed me that by using the dragline for this purpose, a saving of between \$9,000 and \$11,000 was effected—the dragline cost \$9,500, thus saving the State enough to pay for the dragline on this project alone.

Two years (1929 and 1930) the farming was practically entirely under my direction, for Capt. Brown (the farmer) was slowly dying and was incapable of handling this work. During those two years, I produced for the State the largest crops we have ever produced of practically everything, except corn. One crop alone—sweet potatoes—we produced 10,000 bushels, on about 125 acres, which is about two thousand bushels more than produced the past year on nearly double the acreage, with more than twice the number of men working in the fields, and more and better mules. Practically the only two years since I have been here that sufficient hog feed was produced were during the two years I handled the farm.

The fall before Florida passed a forestry law, I had plowed fire lines in more than four thousand acres of State Farm woodlands, and have since looked after the protection of our forest lands, and have many thousands of acres of young stands of pine timber to show for my work. I am sure that if you could come and look these over you would never want to see another forest fire, for the value created in these stands of young timber for the State is many times more than the State will ever pay me for services, even if I should be placed on a big pension for the balance of my natural life.

When the Forest Service was created I arranged with that service to plant a nursery for them, and had a nursery growing about three months before your State Forester assumed his duties. About 5000 pine seedlings were shipped that year—something like one and a quarter million are being grown this year, and I have been constantly recognized by the Forest Service as consulting nurseryman, and still have to sign all labor reports.

The State Farm, eight years ago, had made no attempt at beautification, and was a pretty disreputable place in appearance. All the landscape work done here has been under my direct supervision, and for your benefit, I want to say that I have bought practically nothing of any money value in doing this work, for I am a nurseryman by trade and have grown the plants used, except such as I could collect from our woodlands.

For nearly two years the insecticide and disinfectant plant has been in my charge, and I have not only changed products to conform to State and National Health authorities, but have been able to effect a considerable saving. I still have charge of this work, and produce chemicals for other state institutions as well as the State Farm.

In the purchase and mixing of fertilizers I have saved the State many thousands of dollars, for I happen to be the only man on the State Farm who knows how to figure fertilizer formulae, and understands the action of the different fertilizer chemicals.

Railroad construction has been in my charge, and in fact

most of the work of the State Farm has come under my management from time to time, and I feel that if you would investigate I could show you where I have affected an improvement or a savings in practically everything I have handled.

And now, in order to make places for a bunch of more or less incompetent men, the present management has been turning over to others some of my most important projects—to Jimmie Godwin, for instance, the protection of our forest lands, something about which he knows nothing. To Mr. Lander our dragline and drainage system, and he knows practically nothing of the needs of the farm for drainage, nor even methods of starting the work, for he has started the dragline at the upper end of a ditch and to run to a part of the river where no canal has as yet been cut, ignoring the fundamental principle of providing a water way at the end of the ditch.

And the new Laundry has been dumped on me, a work about which I knew nothing. See my notes accompanying for further information about this.

Very respectfully,

(Signed) AUBREY FRINK.

EXTRAVAGANCE

Large quantities of sawn lumber being purchased—the State owns 14000 acres of timber lands, with a considerable amount of standing timber, some of it in outlying sections where it is very apt to be stolen unless used—in fact some was stolen about a year and half ago, and although reported to present Superintendent nothing was ever done about it, nor any investigation ever made. The State also owns its own sawmill.

When the May, 1933, requisitions or orders from the different departments were being made up for purchasing agent, Mr. Jimmie Godwin, who seems to have been giving authority to approve or disapprove such orders, gave instructions to make orders for three months instead of one, and that when June orders were to be made up that another three months supply should be ordered, in order to secure a six months supply ahead of the new budget to become effective on July 1st. This would seem to be an effort to defeat the economy program of our Governor and State Legislature.

I have been informed that within the past two months, the State has purchased two new passenger cars and two new trucks for the State Farm—if I remember correctly Governor Sholtz especially directed that cars and trucks should be put out of commission down to the last possible point for economy.

The Lawtey Road (a County Road) was badly in need of repair. The County was unable to do this work, so Mr. Godwin arranged for the County to furnish a tractor and grader and man, and the State Farm to furnish two trucks, and a crew of men, and furnish gasoline for all machines. Had the work been done on the basis of an upkeep job it would have taken but a very few days, and comparatively little expense. Instead, however, three weeks work with a guard and 10 to 12 men, and a generous supply of gasoline was used, at a time when finances were at a low ebb.

When the new Laundry was arranged for, the original plan called for a two-story building, which would have been just about the right size. But, in order, to give a new man a job it was turned over to a Mr. Lander, who immediately set to work to change all plans and put up a one-story building, which now proves entirely too small for the work required. A water softener was purchased from the N. Y. Laundry, the owner of which (a Mr. Dunk) happens to be a relative of Mr. Lander. This was considered necessary, as our deep well water is very hard. There was, however, ample soft water available being already pumped up to the boilers right beside the new laundry. Mr. Beauvoir, the man who originally designed the laundry, could have told the management of this, as also the present laundry manager (Aubrey Frink), who, when placed in charge of laundry, was surprised to find that this soft water was not being provided for. He had this water piped into the laundry, and while it is possible there may be some saving when the water softener is finally in operation it will take a long, long time to pay for the cost of the softener, if ever.

A negro preacher has been on the State Farm in addition to the regular minister provided for by the last Legislature, and for this negro preacher a far nicer home was built than houses many of our white employees. This preacher is still here.

Tractors have all been torn down, and some of them discarded—they are badly needed and most of them were well worth cost of repairs had we a competent garage man to do this work.

In order to provide pasturage for a small bunch of more or less scrub cows, your stockmen have insisted on burning our

woodlands, and (This might not be provable in a court, but everyone here is thoroughly convinced it is so) have set fires in some of the finest stands of young timber on the State Farm, some having been protected for five years or more. Never, in more than eight years, have the stockmen (the dairy being excepted, for that is very efficiently managed) have they planted any pastures, nor has the farmer arranged for any, although he is father of the stockman. Young timber to the value of many times the value of all the meat cows on the State Farm has been burned each of the past two years.

INCOMPETENCE

The present Superintendent has made no effort to familiarize himself with the actual working of the Farm, and its different departments, having grouped around himself a small bunch of men here, and leaves to them the entire running of the Farm, and they have certainly not proven themselves capable men. S. H. Blich being in charge of the farming operations could never have made a successful crop, had he not had a man raised here as assistant, and even with that assistance the showing has been anything but a good one, and the cost has been more for guards, fertilizer and mule feeds in many instances than the value of the crops, as I understand from the cost accounting department. Now Mr. Blich gets out on the farm but little, having found it necessary to stick around headquarters about all the time. Mr. James Godwin also finds it unnecessary to pay any attention to the tag plant and shoe shop, having been given the position of "Production Manager" He also finds it necessary to stand around headquarters and try to get himself placed in charge of other departments, for which he has no training or ability. Both of these men have tried to grab control of all authority, and are thoroughly disliked by the majority of the employees.

FAMILY CONNECTIONS

The Blich family has been employed in connection with the prison system for many years. Dr. Blich, A. N. Blich, J. S. Blich, and now S. H. Blich, who keeps his son, Edwin Blich, on an important job, while another relative, J. G. Blich, is also employed. I understand that another relative is also employed here, a Mr. Griffin, as Canning Plant and Cane Mill Manager—he was a small farmer, which fitted him for this responsible position.

SPITE WORK

In order to gain control of the State Farm, S. H. Blich has gotten control of mules and plows, and has prevented their use in nurseries and other work, and thus has caused a considerable quantity of this class of plants to die for lack of work. He has also obtained permission from the Superintendent to plow up crotalaria in orchards, and has done this at a time when it has caused the orange grove to drop a large portion of its fruit—this against protest of horticulturist.

TOO MANY TRUSTIES

A glance at attached work sheet will show an exceptionally large number of trustees, far more than institutions of this kind usually allow. And they are trusted far more than is usual. One man (a life-timer) by the name of Padgett has been stationed nearly six miles away from headquarters, with his wife and family, and this is the man who the forest ranger is fully satisfied has fired our young forests in order to provide tender wire grass for a bunch of scrub cows.

TOO MANY MADE JOBS

An economical administration of the State Farm could eliminate, without loss of efficiency, at least eight rather well paid employees, and it would be very advisable to replace some others with more competent men. An elimination suggestion would be S. H. Blich and his son, Edwin, his relative, J. G. Blich, and his other relative, Mr. Griffin, James Godwin to be replaced, Lander—not needed, Green, Griner, Brown and the negro preacher. The State Farm could run without these men to better advantage than with them.

59—S. B.

P. S. Would suggest that all May orders from State Farm be held up until they can be gone over carefully by the Governor and approved, as I feel sure that excess quantities of goods have been ordered in many instances, and probably some things which could be very well eliminated. This will require quick action, through purchasing agent.

Quite a few of these figures are inaccurate, but that is the way records are being kept. They are near enough, however, to give a fairly good idea of distribution of men.

By referring to work sheet attached you will notice that it calls for a total of 1562 inmates, and that it also shows the following as trustees:

May 26, 1933.

Hon. Bryan Willis,
State Auditor,
Tallahassee, Florida.

Dear Sir:

Pursuant to instructions received we have made an investigation of certain reports, and an examination of certain accounts and Departments of the Florida State Farm, Raiford, Florida.

We have interviewed all parties referred to us by the Sen-

ate Committee, also various other individuals suggested to us by those interviewed, whom they thought might be in a position to give us information that would reveal irregularities of, or mis-management of the officers and employees of the Institution.

Such interviews revealed only suppositions or assumptions that where there were so many rumors there must be something wrong. No one contacted could give us a single fact that could be substantiated. We made a diligent inquiry in every instance and found only hearsay evidence.

These inquiries were made of people residing in Starke, Lake Butler and Raiford. In a large majority of instances the chief complaint made was that too many gratuities were allowed employees, such as vegetables, milk, gasoline, water, lights, etc., and that various articles were being sold to outsiders in competition with storekeepers. Our investigation shows that only a few sales were made to outsiders and it was stated that these were made only in cases of emergency.

As to gratuities we are submitting the principal items as Exhibits "A" and "A-1".

In addition to the people contacted who are not connected with the Institution, we interviewed numerous paid employees and inmates of the Institution. The result of these interviews did not reveal any additional information other than is contained in the foregoing mentioned Exhibits.

The records of the Cost Accounting Department show that

during the period January 1, 1932 to and including March 31, 1933, the following household furnishings were purchased for the Superintendent's home:

The records show that household furniture, in addition to the above, was recently purchased on dates as follows:

December 12, 1930	\$ 484.75
Period January 1, to June 30, 1931	1,394.90
August, 1931	250.45
September, 1931	29.64

TOTAL

.....\$2,159.74
We checked the records of the Filing Station and show in Exhibit "B" and Exhibit "B-1", detail of same.

Our investigation of the cost of maintaining the Superintendent's home is reflected in Exhibit "C". We have divided the maintenance into three periods, namely:

FIRST PERIOD—January 1, 1932 to June 30, 1932, J. S. Blitch, Superintendent.

SECOND PERIOD—July and August, 1932, home occupied jointly by the widow of former Superintendent Blitch and the present Superintendent Chapman and family.

THIRD PERIOD—September 1, 1932 to March 31, 1933, L. F. Chapman, Superintendent.

The following information was furnished us on request by the present Superintendent, showing visitors entertained at the home for periods July and August, 1932, and September 1, 1932 to March, 1933. This information was prepared from memory. At our suggestion the Superintendent states he will keep a Guest Register in the future.

April	15.07
TOTAL	\$156.50

Requisitions for sales do not show to whom sold. On inquiry we were advised that on very rare occasions prescriptions are filled in emergency cases for residents of Raiford, Florida.

Cost of Rev. N. B. Puller, colored Chaplain, dwelling is shown in Exhibit "B".

We do not find any information in the records showing that the furniture in Rev. Puller's house was purchased by the Institution.

During a visit to this house, at which time we interviewed Rev. Puller, he stated in substance the following:

"Receives a salary of \$50.00 a month, house to live in, lights, water, fuel, one quart of milk daily and syrup. Vegetables are furnished free about once or twice a week. Says he bought his furniture at Gainesville for \$350.00, states he bought his own automobile and that he does not receive free gasoline."

Upon investigation of the Cost Accounting records we found that the total cost of the store building could not be obtained, as it was not yet entirely completed. The following is the cost so far as shown by the records:

12,963 ft. Lumber	\$206.65
Roofing	18.38
Electric Fixtures	8.70
Plumbing	4.84
Hardware, Sash Doors, Etc.	72.04
Hauling and Miscellaneous	3.44
TOTAL	\$314.05

The building is a one room store, with a space approximately 30 by 40 feet.

We made a diligent inquiry as to whether goods would be sold to anyone not connected with the Florida State Farm, and were assured that no sales would be made to "outsiders" and that the store would handle only staple articles of groceries for the convenience of employees.

The records show that 7 inmate servants are furnished the home of the Superintendent and 44 to other employees of the Institution.

A comparative salary list for April, 1932 and April, 1933, is shown as Exhibit "F".

We show in Exhibit "G" Maintenance Cost of inmates from July 1, 1932 to and including March 31, 1933.

In Exhibit "H" is shown a list of the various departments as shown by the records of the Cost Accounting Department.

GENERAL COMMENTS

As requested by the chairman of the Senate Committee, we made general observations of the management of the Institution. It appears that most, if not all, of the Superintendent's time is required to handle the prison phase of the Institution and that he properly gives this matter first consideration. Exhibit "H" shows that the Institution is divided into what is called Departments and that these amounts to more than fifty in number. The records show that some Departments operate at a profit and some at a loss, but as a whole they operate at a loss. (See Exhibit "G".)

Information obtained from the Power Plant reveals a very high per capita use of electric energy and water. The records show kilowatt hours generated during the month of—

March, 1933	135,350 K.W.
April, 1933	125,800 K.W.
The records show water pumped as follows:	
One day—May 22, 1933	696,000 Gallons
One day May 23, 1933	406,920 Gallons
One day—May 24, 1933	660,840 Gallons
Total for 3 days	1,763,760 Gallons
Average per day	587,920 Gallons

Estimating that water is used by two thousand persons this makes a per capita average of 294 gallons per day, which from a comparative standpoint is very high.

We secured a copy of the prison menu prepared by the Dietitian, covering a recent period of two weeks. This was verified by prisoners as being approximately correct as to foods served. The quantity and variety appeared to satisfy the prisoners but all prisoners interviewed stated that the food was poorly prepared.

Upon inquiry of one of the oldest employees in point of service, we received the following information as to relatives in the employ of the Institution:

- 1 set of 7 brothers
- 1 set of 3 brothers
- 4 sets of 2 brothers each
- 3 sets of fathers with 1 son each
- 2 sets of brothers-in-law
- 3 sets of sons-in-law
- 3 uncles with 1 nephew each
- 1 husband and wife

We find that adequate accounting records have been installed, including general and cost accounting records, but that these records are not kept accurately or up to date.

The Institution has grown to such proportions, having a population of about two thousand, that in our opinion it is humanly impossible for any one individual to properly care for the complaints and needs of approximately sixteen hundred prisoners and a large number of employees and their families and to efficiently and economically manage more than fifty industrial and agricultural departments.

In view of the foregoing we believe it would save the State quite a large sum by the employment of a competent and experienced business manager to direct or conduct the business affairs of the Institution.

Respectfully submitted,
(Signed)

J. M. COOLEY
JOHN W. WILLIAMS
CLIFF A. EDWARDS, Auditors.

SUMMARY

Sales to Employees	\$ 5,057.06
Charges to Various Departments	13,697.09
Gratis to Officers and Guards	720.10

Net Sales\$19,474.25
Sales to employees represent actual sales for which money was collected.

Sales to departments represent gasoline, oils and kerosene used by various departments which are expense items.
Gratis to officers and guards represents principally kerosene allowed for cooking purposes.

From signed requisitions used for purchases from filling station, very little was sold to persons not connected with the farm or State. We were advised that sales to "outsiders" were made only in emergency cases, which were very rare.

Assistant State Attorneys, when necessary, may be authorized by the Legislature and be appointed temporarily by the Governor, but their terms of office shall not extend beyond the next ensuing session of the Legislature. Where one State Attorney is provided hereunder in any one county, he shall combine the duties State Attorney and County Solicitor, and the latter office shall be considered abolished.

By permission, the following Conference Committee Report on Senate Bill No. 175 was submitted:

June 2, 1933.

Hon. T. G. Futch,

President of the Senate,
Tallahassee, Florida.

Sir:

Your Senate Managers of the Joint Committee heretofore appointed to adjust the differences existing between the Senate and the House of Representatives, concerning House Amendments to Committee Substitute to Senate Bill No. 175, respectfully beg leave to report as follows:

1. That we have held five separate conferences with the House Managers of said Conference Committee in the effort to reach an agreement.

2. That one of the House Managers suggested an amendment to the effect that at the end of two years after said Act should become operative as to any defaulting political unit, such unit might at its option, if dissatisfied with the efforts of the Board of Administration to accomplish a refunding of its bonded indebtedness, call a referendum election of its electors at which such unit might determine whether or not it should be excluded thereafter from all of the provisions of said Act.

This suggestion was accepted by all of the Senate Managers of the Joint Conference Committee, but was not accepted by any of the House Managers.

3. Another amendment was suggested by one of the Senate Managers to the effect that before the actual issuance of any refunding bonds of any defaulting political unit, the refunding agreement as negotiated by the Board of Administration should be submitted to the qualified freeholders of such political unit at a referendum election. This suggestion was agreed to by all of the Senate Managers, but none of the House Managers would agree thereto.

4. As an alternative proposition to the one outlined in Paragraph 3 hereof, one of the Senate Managers suggested another amendment to the effect that for the purpose of passing on the refunding agreement any unit affected might designate five freeholders to sit on the Board, with equal voting power on the Board as to the refunding program of said unit. This was accepted by all of the Senate Managers, but was not accepted by any of the House Managers.

5. The Senate Managers notified the House Managers of their willingness to recommend that the Senate concur with the substance of the House Amendment to provide that nothing in this Act should in any way modify the provisions of House Bill No. 30 passed at this session.

6. Notwithstanding the above, the House Managers refused

to recommend that the House recede from its principal amendment No.3 requiring preliminary referendum elections in all units and no agreement of any sort could be reached on the part of the Senate Managers with the House Managers. The Managers of the House would not even agree to report a disagreement to the respective Houses until after five separate conferences and until the last daily session allowed by the Constitution was nearing the hour of final adjournment.

Respectfully,
S. L. HOLLAND,
S. W. ANDERSON,
WALTER W. ROSE.

Senator Anderson moved that the Conference Committee on the part of the Senate to confer with a similar committee on the part of the House of Representatives to adjust the differences between the Bodies on Senate Bill No. 175, be discharged.

Which was agreed to.
And it was so ordered.
