REPORT OF SENATE AND HOUSE COMMITTEES APPOINTED IN RESPONSE TO REQUEST OF GOVERNOR WITH RELATION TO BUILDING PROGRAM

Honorable S. D. Clarke, President of the Senate

Honorable T. B. Beasley, Speaker of the House

Sirs:

Your Committees have jointly conferred with the Board of Commissioners of State Institutions, representatives of the Board of Control and heads of almost all State Institutions. The goal for these conferences has been to ascertain;

- (1) The current status of buildings and equipment obligated for;
 - (2) The plans developed for future buildings with estimated cost;
 - (3) The total funds available May 15, 1947, by reason of transfer of surplus funds to the building account \$26,761,064.47;
- (a) The amount of the total available which has been definitely obligated for particular construction: 19,053,865.00;

- (b) And the balance of the total available as of May 15, 1947, not definitely obligated:\$ 7,707,199.47:

The Committee has further attempted to ascertain the relative needs of the various institutions and agencies of the State of Florida, both from conferences as set forth, and from personal knowledge of Committee members gained from visits to several major institutions.

It is recommended that the Building Program heretofore instituted and obligated for by the Board of Commissioners and Board of Control be ratified by this Legislature (Schedule A). Considerable attention has been given to the matters of the Supreme Court Building and the Music Building proposed at the Florida State University. Although there was general agreement that other State needs might well have had priority over those satisfied by these buildings, the Committees decided by a majority vote of all members to include these obligations in Legislature ratification recommendations.

Your Committees have assumed that the possibilities of further accretions to the building account are so limited within the next biennium as to necessitate expenditure of all available funds on primary needs. It is further felt that, in the event further sums should become available from sources now unknown, it is desirable to set up a Building Program, beyond primary needs of secondary priority, to be carried out if such unforeseen funds should become available. Such a policy, your Committees feel, will take care of all contingencies through proper exercise of Legislative power, so far as it is possible to do.

Your Committees therefore recommend that the program of construction set forth in Schedule B be appropriated for and be designated as of first priority.

Your Committees further recommend that the program of construction set forth in Schedule C be appropriated for and be designated as of secondary priority.

Respectfully submitted,

Senate Committee:

JEFF FLAKE
WALLACE E STURGIS
A. L. WILSON
HARRY E KING
C. L. ALFORD
CHARLEY E JOHNS
PHILIP D. BEALL, JR.

Section 4. The State Board of Control is hereby empowered to fix and collect fees for materials, correspondence study and extensions incident thereto, through the General Extension Department; and it is expressly provided that all such fees so collected by the said Board of Control shall not affect the State Appropriation or be deducted therefrom, and they shall be used only for the purposes for which they are collected, and said fees shall be deposited for accounting with the Comptroller of the State of Florida, who upon the order of said Board of Control, shall draw his warrants on the State Treasurer in payment for the said materials, correspondence study, and extension teaching and expenses incident thereto. In its Biennial Report the Board of Control shall make report in detail of the expenditure of said funds, together with a report of the work done.

Section 5. The Board of Control shall determine the length of the School Term of all Educational Institutions for which funds are appropriated herein.

Section 6. The State Board of Control, and the Board of Commissioners of State Institutions, are hereby authorized, subject to the approval of the Budget Commission, to purchase automobiles, trucks, tractors and other automotive equipment, for the use of institutions under the management of said Board of Control and said Board of Commissioners of State Institutions.

Section 7. Where the salary of any officer or employee of the State has not been changed by any Act out of the Legislature of 1947, the appropriation for salaries respecting such officer or employee shall control the salary or compensation to be paid such officer or employee.

Section 8. Any monies appropriated by this Act for the first year of the biennium or any remaining balance thereof not used in the first year of the biennium and not contracted to be expended may be used for a like purpose in the second year of the biennium, but any fund unexpended and not contracted to be expended as provided by this Act at the end of the biennium shall revert to the fund from which appropriated and be available for re-appropriation.

Any balances remaining to the credit of the appropriation made herein not disbursed but contracted to be expended shall on or before June 30th of the end of the biennial appropriation year, be certified to the Budget Commission, a copy of which certification shall be filed with Comptroller, showing in detail to whom obligated and the amount of such obligation. In the event this certification is not made and the obligation proven to be just, due and unpaid, then the same shall be paid and charged to the current year's appropriation of the department affected. No official, commission, board, department or other agency of the State Government shall contract to spend or enter into any agreement to spend any monies in excess of the amount appropriated herein and any contract or agreement in violation of this provision shall be null and void. All budgets of all departments and divisions of Government shall be subject to semi-annual revision and control by the Budget Commission.

Section 9. Federal money appropriated by the Congress of the United States to be used for State purposes, whether by itself or in conjunction with monies appropriated by the Legislature of the State, is hereby re-appropriated as far as it may be necessary to the purpose for which same was made available and insofar as the same is permitted by the Federal Statutes.

Section 10. All appropriations provided for by this Act are maximum appropriations, based upon the collection of sufficient revenue to meet and provide for such appropriations. If, in the opinion of the Governor, the revenues to be collected will be insufficient to meet the appropriations herein provided for, he shall so certify to the Budget Commission, and the Budget Commission shall adjust and/or reduce the Budget of any department or Board by the consolidation of positions or duties to the end that efficiency and economy may result therefrom, and the appropriations kept within the revenues of the State. In the event the Budget Commission shall fail to adjust and/or reduce budgets of the several Departments after the Governor has certified that the anticipated revenue will not permit of the maximum appropriation herein made, the Governor is hereby vested with power and authority to effect such changes by executive order, it being the intent and purpose of this Section to prevent any deficit in any Department of the State Government, and that the revenues available shall be used in the most efficient and economical manner; provided, however, that this section shall not be construed to mean that the Governor or the Budget Commission has the power to eliminate any Department of Government.

Section 11. Immediately before the beginning of each fiscal year, the budget commission or the budget director, if there be such officer, shall require the head of each spending agency to submit on forms prescribed by the budget commission, a work program for the budget year, which program shall include all appropriations for operation and all anticipated revenue and receipts, and maintenance expenditures and for the acquisition of property, and it shall show the requested allotments of said appropriations for such spending agency for the ensuing year. The budget commission shall review the requested allotments in the light of the work program of the spending agency concerned and as reported by the budget director, if there be such officer, the budget commission shall, if it deems necessary, revise, alter or change such allotments before approving the same. The aggregate of such allotments shall not exceed the total appropriations available to said spending agency for the budget year. The budget commission, or the budget director, if there be such officer, shall transmit a copy of the approved allotments to the head of the spending agency concerned and also a copy to the state comptroller. The state comptroller shall authorize all expenditures to be made from the appropriations on the basis of such allotments, and not otherwise.

The head of any spending agency of the government, whenever he shall deem it necessary by reason of changed conditions, may revise the work program of his agency at the beginning of any quarter during the budget year and submit such revised program to the budget commission, or to the budget director, if there be such an officer, with his request for a revision of the allotments for the remaining quarters of the budget year. If, upon a re-examination of the work program, the budget commission shall decide to grant the request for a revision of the allotments, the same procedure, so far as it relates to review, approval, and control, shall be followed as in making the original allotments.

In order to provide funds for possible emergencies arising during the budget year in the operation and maintenance expenditures of the various spending agencies, the budget commission may require the head of each spending agency, in making the original allotments, set aside at least five per cent of the total amount appropriated as a reserve. At any time during the budget year, this reserve, or any portion of it, may be returned to the appropriation to which it belongs and be added to any one or more of the allotments, provided the budget commission shall deem such action necessary, and shall notify the comptroller of such action; any unused portion thereof shall remain at the end of the budget period as an unexpended balance of appropriation.

Section 12. In addition to all other appropriations herein

there is hereby appropriated the sum of \$500,000.00 for the purpose of supplying immediate funds for any unforeseen emergency that may arise and for the purpose of supplying additional funds to any state office, commission, department, board, bureau, institution or other agency of the State Government, if the appropriations made herein are found to be insufficient to pay the necessary cost of proper administration of the duties assigned. This appropriation shall be under the complete supervision and control of the State Budget Commission and the Budget Commission is hereby authorized in its discretion, to designate any part of this fund for paying necessary expenses as above provided after public hearing and ample evidence of needs; provided, however, that application to the commission shall first be made in writing, giving a complete statement of funds needed; provided, however, that no expenditures shall be authorized except by vote of a majority of the Budget Commission whether all members are present or not, and, provided further, that this shall not be construed to authorize the Budget Commission to create any new department or function and no part of this appropriation shall be used for attorney fees.

Section 13. Any sum or sums appropriated for salaries, if not required for such purposes, may be applied to expense of the department to which they are appropriated, but in no event shall any sum or sums specifically appropriated for expenses be applied to salaries, except, that day labor shall be construed as coming with Expenses. Any sum paid out under this Act or any other Act from the monies appropriated herein shall be by State Warrant drawn by the Comptroller and countersigned by the Governor upon the State Treasury, payable to the ultimate beneficiary.

Section 14. Contingent Funds shall be available after all other appropriations in this Act has been provided for. All contingent funds shall be under the complete control and supervision of the State Budget Commission.

Section 15. Any Section of this Act, or any special item of appropriation herein contained, if found to be invalid or vetoed by the Governor without over-riding action of the Legislature, shall in no way affect other sections or other items or appropriation contained in this Act.

Section 16. All laws or parts of laws in conflict herewith are hereby repealed.

Section 17. This Act shall take effect on July 1, 1947.
