**SUMMARY ANALYSIS**

The bill limits access to key ingredients (precursors) used in the manufacturing of methamphetamine. The bill defines "ephedrine or related compounds" to include ephedrine, pseudoephedrine, or phenylpropanolamine, or any of their salts, optical isomers, or salts of optical isomers

The bill restricts the quantity of ephedrine or related compounds that may be purchased during specific time periods. The bill requires retailers to adopt an electronic recordkeeping system (logbook) to track real-time point of sale transactions and block sales that exceed the legal limit of ephedrine and related compounds. However, any retailer who can provide the Florida Department of Law Enforcement reasonable showing of imposition of additional costs is exempt from electronic reporting. Furthermore, the bill provides an exemption for specific entities.

The bill may have an insignificant fiscal impact to the state and no fiscal impact to local governments (See Fiscal Analysis).

The bill takes effect July 1, 2010.

## HOUSE PRINCIPLES

Members are encouraged to evaluate proposed legislation in light of the following guiding principles of the House of Representatives

- Balance the state budget.
- Create a legal and regulatory environment that fosters economic growth and job creation.
- Lower the tax burden on families and businesses.
- Reverse or restrain the growth of government.
- Promote public safety.
- Promote educational accountability, excellence, and choice.
- Foster respect for the family and for innocent human life.
- Protect Florida's natural beauty.

## FULL ANALYSIS

### I. SUBSTANTIVE ANALYSIS

#### A. EFFECT OF PROPOSED CHANGES:

##### **Drug Schedules**

Florida law divides controlled substances<sup>1</sup> into five categories ranging from Schedule I to Schedule V. The scheduling of a controlled substance is relevant to how it can be prescribed and to the severity of the criminal offense for its illicit possession, sale or purchase. A drug in Schedule I has a "high potential for abuse and has no currently accepted medical use in treatment in the United States."<sup>2</sup> Schedule II drugs have a high potential for abuse and a severely restricted medical use.<sup>3</sup> Schedule III controlled substances have less potential for abuse than Schedule I or Schedule II substances and have some accepted medical use.<sup>4</sup> A drug in Schedule V has a low potential for abuse relative to the substances in Schedule IV and has a currently accepted medical use in treatment in the United States, and abuse of such compound, mixture or preparation may lead to limited physical or psychological dependence relative to the substances in Schedule IV."<sup>5</sup>

##### **Methamphetamine**

Methamphetamine is a Schedule II controlled substance.<sup>6</sup> The drug has limited medical uses in the treatment of narcolepsy, attention deficit disorders, and obesity.<sup>7</sup> According to the 2008 National Survey on Drug Use and Health (NSDUH), approximately 12.6 million Americans aged 12 or older reported using methamphetamine at least once during their lifetimes, representing five percent of the population aged 12 or older.<sup>8</sup> Commonly called "speed," "crank," "crystal," or "Poor Man's Cocaine," methamphetamine can be smoked, injected, snorted, or taken orally. It produces an initial "high," lasting between 15 and 30 minutes, that is difficult, if not impossible for the user to repeat, leading the user to ingest more and more of the drug and go on longer binges. Long-term methamphetamine abuse can cause addiction, anxiety, insomnia, mood disturbances, and violent behavior. Additionally, psychotic symptoms such as paranoia, hallucinations, and delusions (such as the sensation of bugs

<sup>1</sup> Controlled substances are classified into five schedules in order to regulate the manufacture, distribution, preparation, and dispensing of the substances. See s. 893.02(4), F.S.

<sup>2</sup> s. 893.03(1), F.S. LSD and heroin are examples of Schedule I controlled substances.

<sup>3</sup> s. 893.03(2), F.S. Codeine and morphine are examples of Schedule I controlled substances.

<sup>4</sup> s. 893.03(3), F.S. Butabarbital and anabolic steroids are examples of Schedule I controlled substances.

<sup>5</sup> s. 893.03(5), F.S.

<sup>6</sup> s. 893.03(2)(c), F.S.

<sup>8</sup> *Id.*

crawling under the user's skin) can occur. The psychotic symptoms can last for months or years after methamphetamine use has ceased.<sup>9</sup>

## Methamphetamine Production and Precursors

The ease with which methamphetamine can be manufactured is a major contributing factor to the increase in its use. Rural areas are popular sites for production because strong odors are produced during manufacturing. It is easily "cooked" up by anyone in a makeshift lab hidden in mobile homes, warehouses, motel rooms, or cars.<sup>10</sup> Methamphetamine hydrochloride is produced using ephedrine, hydroiodic acid (both controlled substances), or over-the-counter pseudoephedrine or phenylpropanolamine found in cold medication.<sup>11</sup> Hydroiodic acid is a necessary ingredient in one of the major manufacturing processes. Recently, phenylpropanolamine has been used as a precursor chemical to produce amphetamine. Precursors are substances that, in nature, might be inactive. However, when combined with another chemical the result is a new product.<sup>12</sup>

There are literally thousands of recipes and information about making methamphetamine on the Internet.<sup>13</sup> An investment of a few hundred dollars in over-the-counter medications and chemicals can produce thousands of dollars worth of methamphetamine.<sup>14</sup>

State and federal chemical restrictions of precursors, combined with sustained law enforcement pressure, have reduced domestic methamphetamine production over the past several years.<sup>15</sup> Reported methamphetamine laboratory seizures have decreased sharply each year since 2004; the year that states began implementing strong, retail-level sales restrictions of ephedrine and pseudoephedrine products.<sup>16</sup> Moreover, in September 2006 the federal Combat Methamphetamine Epidemic Act of 2005<sup>17</sup> became effective nationwide, setting restrictions on the retail sale of pseudoephedrine, phenylpropanolamine and ephedrine products.<sup>18</sup> However, purchasing legal quantities of pseudoephedrine at various locations (called "smurfing") circumventing purchasing limitations is common practice among methamphetamine producers.<sup>19</sup>

To address the issue of smurfing, a some states have mandated the use of a real-time electronic pseudoephedrine tracking system. Eleven states<sup>20</sup> have adopted laws requiring pseudoephedrine tracking systems.<sup>21</sup> A tracking system usually includes a "stop sale" or "lead generating" program. In a stop sale program, the seller transmits information about an attempted purchase.<sup>22</sup> The system then notifies the seller that the purchase would be in violation of federal or state over-the-counter sales restrictions.<sup>23</sup> The sale is not completed unless specific exceptions are satisfied. In a lead generating program, all sales are completed and the system analyzes the collected purchase information to identify apparent violations of law.<sup>24</sup>

In contrast, Oregon<sup>25</sup> requires a prescription for all drugs containing methamphetamine precursors, and Alabama<sup>26</sup>, outlawed the sale of drugs containing ephedrine, pseudoephedrine, and phenylpropanolamine unless they are formulated so as to prevent their use in methamphetamine synthesis.<sup>27</sup> However, pharmaceutical companies thus far have not formulated “non-convertible” forms of ephedrine, pseudoephedrine, and phenylpropanolamine, but alternatives to these drugs are now available for some indications.<sup>28</sup>

### Federal Combat Methamphetamine Epidemic Act of 2005

Effective September 30, 2006, federal law requires sellers of nonprescription (over-the-counter) ephedrine, pseudoephedrine, or phenylpropanolamine to place items containing these ingredients where customers do not have direct access before the sale is made ("behind the counter" placement) or in a locked cabinet located in an area of the facility to which customers do not have direct access. The seller must deliver the product directly into the custody of the purchaser.

The seller is required to maintain a logbook (paper or electronic) that identifies: a products name; quantity sold; name and address of purchaser; and the date and time of the sale. The purchaser must present a photographic identification card issued by a state or the federal government (i.e. driver’s license) and sign a logbook. The logbook must contain a notice to purchasers that entering false statements or misrepresentations in the logbook may subject the purchaser to criminal penalties under Title 18 U.S.C. § 1001 and such notice must specify the maximum fine (\$250,000.00) and term of imprisonment (5 years). The federal Combat Methamphetamine Epidemic Act of 2005 (“Act”) authorizes disclosure of information contained in the logbook to the Attorney General and to State and local law enforcement agencies. The Act prohibits accessing, using, or sharing the logbook information for any purpose other than to comply with the Controlled Substances Act or to facilitate a product recall to protect public health and safety is prohibited. A seller who in good faith releases logbook information to Federal, State or local law enforcement authorities, is immune from civil liability for releasing the information unless the release constitutes gross negligence or intentional, wanton, or willful misconduct.

The Act sets daily sales limit of ephedrine base, pseudoephedrine base, or phenylpropanolamine base at 3.6 grams per purchaser, regardless of the number of transactions.<sup>29</sup> In addition, the act makes it unlawful for any person to knowingly or intentionally purchase at retail store more than 9 grams during a 30 day period (of which no more than 7.5 grams can be imported by private or commercial carrier or the Postal Service).<sup>30</sup>

**Table 1. Daily sales limit of ephedrine base, pseudoephedrine base, or phenylpropanolamine base is 3.6 grams per purchaser, regardless of number of transactions.**

## Florida Law

Section 893.1495, F.S., provides that no person shall knowingly deliver in any single over-the-counter retail sale:

- any number of packages of any drug containing a sole active ingredient that he or she knows to contain a combined total of more than 9 base grams of ephedrine, pseudoephedrine, phenylpropanolamine, or any of their salts, optical, isomers, or salts of optical isomers;<sup>31</sup> or
- more than 3 packages, regardless of weight containing any such sole active ingredient.<sup>32</sup>

Additionally, no person shall knowingly display and offer for retail sale packages of any drug having a sole active ingredient of ephedrine, pseudoephedrine, phenylpropanolamine, or any of their salts, optical, isomers, or salts of optical isomers other than behind a checkout counter where the public is not permitted.<sup>33</sup>

Any person who violates these provisions commits a second degree misdemeanor<sup>34</sup> for a first offense, a first degree misdemeanor<sup>35</sup> for a second offense and a third degree felony<sup>36</sup> for a third or subsequent offense.

Moreover, current law prohibits a owner or primary operator of a retail outlet where ephedrine, pseudoephedrine or phenylpropanolamine products are available for sale shall knowingly allow an employee to engage in the retail sale of such products unless the employee has completed an

<sup>33</sup> s. 893.1495(2), F.S.

<sup>34</sup> Second degree misdemeanors are punishable by up to 60 days in prison and/or up to \$500 fine. ss. 775.082, 775.083, F.S.

<sup>35</sup> First degree misdemeanors are punishable by up to 1 year in prison and/or up to \$1,000 fine. ss. 775.082, 775.083, F.S.

<sup>36</sup> Third degree felonies are punishable by up to 5 years in prison and/or up to a \$5,000 fine. ss. 775.082, 775.083, F.S.

employee training program that must include, at a minimum, basic instruction on state and federal regulations relating to the sale and distribution of such products.<sup>37</sup>

The provisions in s. 893.1495, F.S., supersede any municipal ordinance or regulation passed on or after July 1, 2005, to the extent that such ordinance or regulation is more restrictive than the provisions of the section.<sup>38</sup>

### **The Effects of the Bill**

The bill provides the definition of “ephedrine or related compounds” as ephedrine, pseudoephedrine, or phenylpropanolamine, or any of their salts, optical isomers, or salts of optical isomers and conforms the change in terminology throughout the bill.

The bill specifically provides that a person may not knowingly obtain or delivery in any retail over-the-counter sale, in a single day, a nonprescription compound, mixture, or preparation that contains ephedrine or related compounds that:

- Contains a total of 3.6 grams per of ephedrine or related compounds.
- Consists of more than three packages (regardless of weight) that contain ephedrine or related compounds.

Additionally, the bill makes it unlawful for any person to knowingly or intentionally purchase at a retail store more than 9 grams of ephedrine or related compounds within a 30-day period.

The bill requires purchasers of ephedrine or related compounds to:

- be at least 18 years of age;
- present a government issued photo identification showing their name, date of birth, address, and photo identification number; and
- sign a log book (paper or electronic).

The bill requires retailers to use an electronic recordkeeping mechanism (or logbook) that provides real-time tracking of non-prescription over-the-counter ephedrine or related compound purchases. The electronic logbook must block sales in excess of legal quantities. The electronic logbook must be approved by the Florida Department of Law Enforcement (FDLE). Any retailer who can provide FDLE a reasonable showing of imposition of additional costs is exempt from electronic reporting. However, bill provides that a nonprescription compound, mixture, or preparation containing any quantity of ephedrine or related compounds cannot be sold over-the-counter unless the sale is reported to an FDLE approved electronic recordkeeping system.

The bill specifies that the electronic logbook must record:

- the date and time of the transaction;
- name, date of birth, address, type of photo identification presented and the identification number; amount and name of the compound, mixture or preparation purchased;
- signature of the purchaser or a unique number that is associated with a paper signature that is maintained on the premises.

Current law<sup>39</sup> requires owners or primary operator of retail stores to ensure that all employees that engage in the retail sale of ephedrine or related compounds must attend an employee training program that includes basic instruction on state and federal regulations. The bill provides, via a cross reference, that failure to provide this training to employees is a second degree misdemeanor (first offense); first degree misdemeanor (second offense) and a third degree felony (third offense).

The bill exempts the following entities from these provisions:

- licensed manufacturers who lawfully manufacture and distribute products;

---

<sup>37</sup> s. 893.1495(3), F.S.

<sup>38</sup> s. 893.1495(4), F.S.

<sup>39</sup> s. 893.1495(5), F.S.

- wholesalers who lawfully distribute products;
- hospitals licensed under ch. 395, F.S.;
- licensed long-term care facilities;
- government-operated health departments;
- physician offices;
- publicly operated prisons, jails, juvenile correctional facilities, or private adult/juvenile correctional facilities under contract with the state;
- public or private educational institutions that maintain health care programs; and
- government operated or industry operated medical facilities serving employees of the government.

The bill takes effect July 1, 2010.

**B. SECTION DIRECTORY:**

**Section 1.** Amends s. 893.1495, F.S., relating to retail sale of ephedrine and related compounds.

**Section 2.** Provides an effective date of July 1, 2010.

**II. FISCAL ANALYSIS & ECONOMIC IMPACT STATEMENT**

**A. FISCAL IMPACT ON STATE GOVERNMENT:**

1. Revenues:

None.

2. Expenditures:

See Fiscal Comments.

**B. FISCAL IMPACT ON LOCAL GOVERNMENTS:**

1. Revenues:

None.

2. Expenditures:

None.

**C. DIRECT ECONOMIC IMPACT ON PRIVATE SECTOR:**

Potentially there could be a cost to retailers for either creating an in-house or purchasing a real-time electronic logbook. There could be a cost associated with maintaining an electronic logbook and training of retail staff. Many of the major retail establishments already maintain electronic logbooks in an effort to comply with federal law. Retailers that do not already have computers equipped with card readers capable of scanning and capturing information from the magnetic strip on the back of driver's licenses may decide to purchase this equipment or have someone manually enter the required information into the electronic logbook.

However, the fiscal impact to retailers may be mitigated since the bill provides an exemption for retailers from electronic reporting if they can make "reasonable showing of imposition of additional costs".

**D. FISCAL COMMENTS:**

According to FDLE, there will be a workload impact to one full-time equivalent employee who will coordinate with law enforcement agencies and the (electronic recordkeeping system) vendor to provide access to law enforcement officers. FDLE will manage this increase in workload within existing resources. The provisions of the bill will require FDLE to use an electronic recordkeeping system. Currently there are electronic recordkeeping systems available at no cost to users (i.e. state law

enforcement agencies, retailers, or pharmacies). One such, electronic recordkeeping system is being offered by Apriss/MethCheck. This system is part of the National Precursor Log Exchange (NPLex). The Apriss/MethCheck electronic recordkeeping system is being paid for by manufacturers of ephedrine products and is managed by the National Association of Drug Diversion Investigators.<sup>40</sup>

On February 23, 2010, the Criminal Justice Impact Conference met and concluded that the bill will have an insignificant impact on prison beds.

### III. COMMENTS

#### A. CONSTITUTIONAL ISSUES:

##### 1. Applicability of Municipality/County Mandates Provision:

Not applicable. This bill does not appear to: require the counties or cities to spend funds or take an action requiring the expenditure of funds; reduce the authority that cities or counties have to raise revenues in the aggregate; or reduce the percentage of a state tax shared with cities or counties.

##### 2. Other:

The bill may not provide FDLE sufficient guidance to determine “reasonable showing of imposition of additional costs” or guidelines for approving electronic logbooks and so may implicate the non-delegation doctrine contained in Article II, Section 3 of the Florida Constitution.

#### B. RULE-MAKING AUTHORITY:

The bill does not provide FDLE rule-making authority, which is needed to promulgate rules for approving electronic logbooks and determining reasonable showing of imposition of additional costs.

#### C. DRAFTING ISSUES OR OTHER COMMENTS:

There are some inconsistencies in the bill. The bill mentions that retailers are required to use an electronic recordkeeping mechanism that provides real-time tracking and blocking of sales. However, the bill does not require the retailers to *report* to an electronic recordkeeping system. But (6) states that a retailer may not sell ephedrine or related compounds unless *reported*. It is unclear what and to whom the retailer is supposed to report. Furthermore, (6) appears to conflict with the intent of (7), which provides an exemption for electronic reporting if reasonable showing of imposition of additional costs is provided.

### IV. AMENDMENTS/COUNCIL OR COMMITTEE SUBSTITUTE CHANGES

---

<sup>40</sup> Email correspondence with Florida Department of Law Enforcement on file with Health Care Regulation Policy Committee staff (March 13, 2010).
